AI/ML Engineer | AI Developer | Full-Stack Developer | 2x Hackathon Winner | GATE 2026 Qualified

SUMMARY

AI/ML & Full-Stack Software Developer (B.Tech CSE 2026, CGPA 8.63) with hands-on experience as an AI Developer Intern, AI Model Evaluator and AI/ML Mentor. Builds LLM applications, multi-agent systems and RAG pipelines using Python, LangChain, LangGraph, Next.js and TypeScript. 2x hackathon winner, GATE 2026 qualified, strong DSA in C++.

TECHNICAL SKILLS

- **Languages & CS Core:** Python, C/C++, JavaScript, TypeScript, SQL, HTML5/CSS3, Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Problem Solving
- **AI/ML & GenAI:** Generative AI (GenAI), LLMs, RAG, Agentic AI, Model Evaluation, Multi-Agent Systems, LangChain, LangGraph, Prompt Engineering, Vector Databases (Qdrant), Mem0, Hugging Face, Google Gemini API, Scikit-learn, CNN, Explainable AI
- **Web & Backend:** React.js, Next.js, Flask, REST APIs, Tailwind CSS, Prisma, Pydantic, Playwright
- **Databases:** MongoDB, MySQL, Neo4j, Qdrant (Vector Database), Firebase
- **Tools & DevOps:** Docker, Git/GitHub, Linux/Bash, Claude Code, OpenCode CLI, Vercel, System Design

EXPERIENCE

TechNex Cloud Networks | AI & ML Mentor and Python & DBMS Instructor (Part-time, Remote) **Jul 2026 - Present**

- Teach an AI/ML batch covering ML, Deep Learning, GenAI, LangChain, LangGraph, Vector DBs and Mem0; capstone is students' own Agentic AI platform.
- Delivered a 45-day MongoDB + Python course (CRUD, aggregation, Flask REST APIs) ending in a cloud-deployed Canteen Pre-Order System.

Turing | AI Model Evaluator (Freelance, Remote) **Aug 2026 - Oct 2026**

- Evaluated LLM outputs (Oracle, GLM, connector tasks, fairness evaluations) and added verifiers for reliable, unbiased assessment at scale.
- Applied Python, Docker and Generalized Linear Models (GLM) in model-evaluation workflows using OpenCode CLI.

J D Jones & Co (P) Ltd | AI Developer Intern (On-site, Kolkata) **Jul 2026 - Aug 2026**

- Contributed to the marketing module of an AI-native ERP for a 100-year-old fluid sealing manufacturer.
- Used Python and Claude Code to develop enterprise-grade AI features within real production workflows.

KEY PROJECTS

Deb Job Agent - Autonomous AI Job Application System | Personal | [Code](#) **Jun 2026**

- Built a **LangGraph** multi-agent system with **Playwright** that scrapes 6 job portals daily and scores job-resume fit with the **Gemini API**.
- Automated a 1,831-contact outreach campaign (50 personalised emails/day) with MX validation, bounce detection, **Mem0** memory and a **Flask** monitoring dashboard.

Aayojan.AI - Heritage Event Management Powered by AI | Hackathon | [Demo](#) **Sep 2025**

- Built an AI-driven event platform with multilingual content generation, smart finance tracking, role-based dashboards and an AI poster maker. **Winner, MetaMorph Season-1 (36-hour hackathon).**
- Stack: **Next.js (App Router)**, **TypeScript**, **Tailwind**, **Prisma**, **MySQL**, **Better Auth**, **Firebase Auth**, **Gemini 2.5**, **Vercel**.

Explainable ML Model for Arrhythmia Detection | Academic | [Code](#) **May 2025 - Jun 2026**

- Achieved **98% accuracy** on the MIT-BIH dataset using CWT features, GAN-based class balancing, a CNN (**AlexNet**) and **Grad-CAM** explainability.

Aarav - Personal AI Assistant | Personal | [Code](#) **Feb 2025 - Present**

- Built a voice-driven AI assistant with task automation using **Google Gemini AI**, **ElevenLabs TTS** and speech recognition in modular pipelines.

EDUCATION

MAKAUT, WB, Kalyani - B.Tech, CSE (CGPA: 8.63/10) **2022 - Jul 2026**

Coursework: OS, COA, Computer Networks, DBMS, Automata Theory, DAA, Machine Learning, Explainable AI (X-AI)

Karkai Vivakanda Vidyapith - 12th Science (91.6%) | **Panithar G M Siksha Sadan** - 10th (93.15%)

ACHIEVEMENTS & LEADERSHIP

- **Winner - MetaMorph Season-1** (36-hour hackathon) for Aayojan.AI | **Hack4Bengal 3.0:** Best Use of Composio track (Narada Bot)
- **GATE 2026 Qualified** - CS & IT | **Certifications:** Decode DSA with C++ (Physics Wallah) ([Verify](#)); Full-stack Generative & Agentic AI with Python ([Verify](#))
- Language Coordinator, Hackaut Coding Club (100+ students); AI/ML Core Member, GDSC MAKAUT '23 (mentored 100+ students)
